

Factoring

The logic of concepts being led by chosen factors which are used within any instance.

Factor

The leading characteristics, parameters and/or insights that form a concept.

For any concept brought up, think about the relationship between its factor(s).

Concepts

An abstract idea arranged in an evergrowing pattern by the relationship of its leading factors.

For every instance brought up, think about the concept(s) attributed to them.

Instance

The use case(s) of one or more concept(s).

For any topic brought up, think about the concept(s) attributed to it.

USE Category

Are the factors I'm receiving:

- Unimportant,
- Self-Explanatory,
- Easy Enough to Memorize?

Simply feel if you need to write it down.
